Elphinstone College, Mumbai <i>Maharashtra State Board Of Secondary & Higher Secondary Education</i> 67.75%	2018 – 2020
Model English School, Dombivli. <i>Maharashtra State Board Of Secondary & Higher Secondary Education</i> 75.0%	2018

TECHNICAL SKILLS

- Javascript
- Git/Github
- Java
- RESTful API
- React
- MongoDB
- Python
- Django
- Postgres

SOFT SKILLS

- Problem-Solving
- Team Work
- Communication
- Adaptability

PROJECTS

Aurastream - Streaming Website

- Built a responsive media streaming platform using React and Tailwind CSS.
- Implemented state management with Zustand and API integration using Axios.
- Backend developed with Node.js, Express, and MongoDB (Mongoose).

Itinerary Planner Web Application

- Built an interactive travel management platform using **JavaScript** and **Leaflet** to visualize optimized journey maps.
- Integrated **Claude AI** to provide personalized, AI-assisted itinerary suggestions and seamless trip planning.
- Implemented route-based navigation for efficient data handling and automated PDF generation for offline itineraries.

Hakimi Establishment Ecommerce Website (Currently working)

Developing a fully responsive hardware store platform featuring dynamic product filtering, real-time search, and multi-language support (English/Arabic). Implemented global state management with Zustand for cart functionality and integrated REST APIs for user authentication and order history.

CERTIFICATIONS

-The Web Developer Bootcamp 2025: (2021 - 2025) - Udemy | Comprehensive full-stack course covering HTML, CSS, JavaScript, and MERN stack (MongoDB, Express, React, Node.js). Built real-world projects and gained strong foundation in web development.

-Selenium WebDriver 4 with java 2025: (Aug 2025 - Sept 2025) - Udemy | Hands-on training in automation testing using Java, TestNG, and Cucumber framework. Gained skills in writing automated scripts, debugging, and improving testing workflows.

-Ethical Hacking: (Jan 2024 - Feb 2024) - Udemy | Learned fundamentals of ethical hacking, WiFi security, and device exploitation techniques. Developed awareness of vulnerabilities.

-The Ultimate Guide to Game Development With Unity: (May 2023 - June 2023) - Udemy | Explored 2D/3D game design principles, Unity engine features, and C# scripting. Built interactive prototypes to understand physics, animations, and asset management.
